

display lighting

illuminating exhibition displays...

With over 21 years successful years manufacturing specialist lighting, the name Display Lighting has grown to be synonymous within the illumination of retail displays, museum showcases, jewellery cabinets, counters and exhibitions.

The aim of Display Lighting, founded in 1999 by lighting design engineer Paul Breedon, was to offer purpose built lighting solutions to the display industry. Today, over 21 years on, Display Lighting has far exceeded its original goal and is now established as a key player within the UK lighting industry offering innovative, attractive and reliable lighting solutions to an array of business sectors worldwide including retail, leisure, exhibition, museum and point of purchase.

The design of bespoke lighting systems is a speciality of Display Lighting and the experienced design team work closely with retailers and their designers in the development of lighting systems to complement and showcase merchandise, branding and displays. Many have reported increased sales as a direct result of specifying and installing Display Lighting LED systems.

So if you have been asked to source and specify lighting for a display and are feeling a bit lost or you are just looking for something different then talk to Display Lighting's professionals. Whatever the lighting application, by using the latest light sources, high quality components and a combined lighting experience of almost 100 years, Display Lighting can help you achieve your desired lighting effect.

Let us help you...see things in a new light.

Case Studies

LED Floodlights

The 16W LED Display Floodlights incorporate a cluster of SMD LEDs giving 1100lm in either 3000K or 4000K white light onto exhibition displays. The head of the luminaire rotates through 320 degrees and tilts through 80 degrees giving complete adjustability for illuminating graphics panels and exhibition boards.

These powerful LED luminaires create an even wash of light eradicating hot spots and are a superb alternative to using halogen and LED spotlights.

The LED Floodlights are supplied complete with pre wired 2m mains leads & LED power supply for connection to both UK & Euro mains outlets. Display Lighting can also provide the Floodlights with daisy chain connectors so that a row of up to ten LED Floodlights can be connected together and powered from a single mains supply.

Display Lighting can provide the LED Floodlights with clamp or surface mount brackets so that they could be screwed directly to the top of thicker panels.

HEELYS

Product Focus

Mains or Battery Operated Spectrum Clamp and Stalk Spotlights

Spectrum Spotlight Kits are supplied as plug and play and are supplied pre-wired with all items required so that they can be plugged into a mains supply or, if there is no access to a mains supply, the spotlights can be operated from compact lightweight rechargeable Lithium Polymer batteries to ensure you have lighting wherever you are exhibiting i.e. art galleries, craft fairs, exhibition halls and museums.

The clamp spotlights are supplied with MR16 LED lamps to give maximum light output onto wall mounted displays. The stalk spotlights are supplied with MR11 LED lamps to make them as unobtrusive as possible while still giving an excellent light output to showcase displays and exhibition plinths.

Display Lighting can manufacture variations of the standard kits so if you require any modification we will be more than happy to help, please speak to one of our sales team.

Case Studies

Spectrum MV Pro Spotlights

Spectrum MV LED Spotlights are designed to be a quick fix lighting solution for illuminating temporary and permanent wall displays. Display Lighting recommends 7W GU10 LED lamps and these are available in colour temperatures of 2800K, 4000K and 6500K giving 550lm onto exhibition displays.

The head of the luminaire rotates through 350 degrees and tilts through 90 degrees giving complete adjustability for illuminating graphics panels and exhibition boards.

The LED Spotlights are supplied as standard with pre-wired 2m mains lead for connection to a UK mains outlet with Euro and US mains connectors also available when specified.

Display Lighting can manufacture Spectrum MV Spotlights with daisy chain mains connectors so that a row of up to ten Spotlights can be connected together and powered from a single mains outlet.

Spectrum MV Spotlights can be manufactured and supplied with clamps for panels up to 50mm thick, surface mount brackets for fixing directly to the top of thicker wall panels or with threaded rods to fix through wall panels.

A photograph of a jewelry display table covered with a white cloth. On the table are various jewelry items including necklaces, bracelets, and earrings, some in display boxes. Two freestanding desktop spotlights with adjustable arms and multiple LED heads are positioned to illuminate the display. The background features a decorative metal railing and framed pictures.

Product Focus

TSP3 & TSP4 Freestanding Desktop Spotlights

The TSP3 & TSP4 desktop spotlight incorporate independently adjustable MR16 GU5.3 LED spotlights for illuminating different areas of the your display making it a perfect lighting solution for craft fairs, events and exhibitions.

The MR16 LED lamps are available in warm white (2800K) or cool white (4000K) to suit the products being illuminated. The base of each spotlight is weighted to ensure stability and is manufactured with a protective felt pad to protect your display.

As with most MR16 LED lamps they emit very little heat so there is no risk to potential customers while browsing your display. Display Lighting can also offer bespoke variations of this standard product so if you require a modification we will be more than happy to help, please speak to one of our sales team.

Product Focus

LENITO LED FLOODLIGHTS

LENITO series modern 240V LED display floodlight incorporates premium 3000K warm white LEDs that are arranged in a grid. This rotating and swivelling luminaire is available in white or black high quality finishes and provides wide homogeneous illumination.

The screw clamp has a wing nut for ease of installation and allows the tube extension length to be adjusted. The power lead has an inline switch and mains plug for fast and simple installation.

Why work with us?

Bespoke British craftsmanship

We have been manufacturing our range of bespoke specialist lighting here in the market town of Altrincham, Cheshire since 1999. Our design team has over 27 years experience designing systems that integrate the latest in lighting technology with a build quality and finish that is worthy of its reputation amongst the shop fitting and retail industries.

Teamwork

None of what we do would be possible without great teamwork and we are so lucky at Display Lighting to have a tremendous team. Every one of us cares about every single order. We strive for perfection in everything that we do but of course it does not end there; our after-sales service is an area where we aim to surpass all expectations.

Reputation

We are very proud to have worked with many of the UK's biggest names in retail, museums and jewellery to provide specialist illumination for displays that can increase sales. We do not employ sales folk, most of our business comes through recommendation. If you walk through any shopping mall in the UK you will find our lighting, working hard.
