

display lighting

Lighting for Craft Fairs & Events

With over 17 successful years manufacturing specialist lighting the name Display Lighting has grown to be synonymous with the display industry.

The aim of Display Lighting, founded in 1999 by lighting designer Paul Breedon, was to offer purpose-built lighting solutions to the display industry. Today, over 16 years on, Display Lighting has far exceeded its original aim and is now established as a key player within the UK lighting industry, offering innovative, attractive, reliable lighting solutions to an array of business sectors worldwide including; retail, leisure, exhibition, museum and point-of-purchase.

The design of bespoke lighting systems is a speciality of Display Lighting and the experienced design team work closely with retailers and their designers in the development of lighting systems to complement and showcase merchandise, branding and displays. Many have reported increased sales as a direct result of specifying and installing Display Lighting systems.

Over the last 16 years Display Lighting's design team have advised hundreds of thousands of clients on the illumination of displays of all shapes and sizes. Their expertise is offered completely free-of-charge and does not limit itself to products manufactured in-house, here in Cheshire. They will use their lighting knowledge to source the very best product for each application.

So if you have been asked to source and specify lighting for a display and are feeling a bit lost, or just looking for something different, then talk to Display Lighting's professionals. Whatever the lighting application, by using the latest light sources, high quality components and a combined lighting experience of almost 100 years, Display Lighting can help you achieve your desired lighting effect.

Let us help you...see things in a new light.

Product Focus

TSP3 Freestanding Desktop Spotlights

TSP3 spotlights incorporate three independently adjustable LED spotlights that have been designed to illuminate desktop displays in art galleries, craft fairs and exhibition halls where general lighting is usually dim.

Each fixed height spotlight rotates through 350 degrees and tilts through 90 degrees ensuring direct light to your display products. The weighted base with protective felt pad ensure complete stability.

TSP3 freestanding spotlights are supplied in pre-wired kit form together with your choice of MR16 LED lamp available in warm white (3000K) or cool white (4000K) to suit products being illuminated.

As with most MR16 LED lamps they emit very little heat so there is no risk to customers while browsing your display.

Display Lighting can also offer bespoke variations of these standard products so if you require a modification we will be more than happy to help, please speak to one of our sales team.

Product Focus

DKIT Mains & Battery Operated Clamp Spotlights

Spectrum Spotlight Kits are supplied as plug and play and are supplied pre-wired with all connectors required to be plugged into a mains supply or, if there is no access to a mains supply, the spotlights can be operated from compact lightweight rechargeable Lithium batteries to ensure you have lighting wherever you are exhibiting i.e. art galleries, craft fairs, exhibition halls and museums.

The clamp spotlights are supplied with MR16 Glass COB LED lamps that are not only eco friendly but look almost identical to halogen alternatives giving bright white light exactly where you need it.

Display Lighting can manufacture variations of the standard kits so if you require any modification we will be more than happy to help, please speak to one of our sales team.

Just $\frac{1}{4}$ of the weight of a traditional sealed lead acid batteries. Our 12V Lithium Polymer battery packs will easily fit in a coat pocket or clip to your belt. Gone are the days of carrying heavy lead-acid batteries. You won't believe the difference!

Polymer Battery**

Product Focus

TSP Battery Operated Freestanding Spotlights

TSP spotlights incorporate independently adjustable LED spotlights and has been designed to illuminate displays in art galleries, craft fairs, exhibition halls and museums where there is no access to mains power.

Each fixed height spotlight rotates through 350 degrees and tilts through 90 degrees. The weighted base incorporates a rechargeable lithium polymer battery, integrated switch and protective felt pad. TSP Spotlights are available in single, double or triple versions. The single spotlight will run for up to 12 hours from a single charge.

Display Lighting offers the freestanding spotlights in single, double or triple versions with MR11 LED lamps that are available in warm white (3000K) or cool white (4000K) to suit the products being illuminated.

As with most MR11 LED lamps they emit very little heat so there is no risk to customers while browsing your displays.

Display Lighting can also offer bespoke variations of these standard products so if you require a modification we will be more than happy to help, please speak to one of our sales team.

Product Focus

TSC3 Mains & Battery Desktop Spotlights

The TSC3 Vertical Clamp Spotlight incorporates three independently adjustable MR16 5W LED spotlights for illuminating different areas of your display making it a perfect lighting solution for craft fairs and shows.

The MR16 LED lamps are available in warm white (3000K) or cool white (4000K) to suit the products being illuminated. The base of the spotlight will clamp onto the edge of table tops that have a thickness between 5mm and 50mm giving complete stability. Each fixed height spotlight rotates through 350 degrees and tilts through 90 degrees.

As with most MR16 LED lamps they emit very little heat so there is no risk to customers while browsing your display. Display Lighting can also offer bespoke variations of these standard product so if you require a modification we will be more than happy to help, please speak to one of our sales team.

Why work with us?

Bespoke British craftsmanship

We have been manufacturing our range of bespoke specialist lighting here in the market town of Altrincham, Cheshire since 1999. Our design team has over 27 years experience designing systems that integrate the latest in lighting technology with a build quality and finish that is worthy of its reputation amongst the shop fitting and retail industries.

Teamwork

None of what we do would be possible without great teamwork and we are so lucky at Display Lighting to have a tremendous team. Every one of us cares about every single order. We strive for perfection in everything that we do but of course it does not end there; our after-sales service is an area where we aim to surpass all expectations.

Reputation

We are very proud to have worked with many of the UK's biggest names in retail, museums and jewellery to provide specialist illumination for displays that can increase sales. We do not employ sales folk, most of our business comes through recommendation. If you walk through any shopping mall in the UK you will find our lighting, working hard.
